SUMMARY

I began learning to code seriously at the end of 2020 and discovered a real passion and talent for it. As my knowledge and experience grew, I began doing freelance website development with some success. Between client work, I worked on my own personal projects and continued learning new skills. Now, with several big projects under my belt and having completed several rigorous online web development courses, I'm making a full-time switch to full-stack web development.

TECHNICAL SKILLS

Languages/Runtimes: JavaScript, TypeScript, Node, C#

Databases/ORMs: PostgreSQL, MongoDB, Entity Framework, Drizzle, Prisma

Frameworks/Libraries: .NET, React, Redux, Express, Next, Tailwind, Bootstrap

Tools: VS Code, Git, GitHub

PERSONAL PROJECTS

Bugscape

Tech: Tailwind, JavaScript, TypeScript, C# .NET 7, PostgreSQL, Entity Framework

Bugscape is a comprehensive, full-stack application designed to streamline bug tracking and project management. It provides an intuitive interface for users to manage projects, track bugs, and collaborate with team members.

PROFESSIONAL EXPERIENCE

Roy Sheppard Digital

Freelancer

Watford

MAY 2022 – Present

Launched a freelance business, roysheppard.digital; specialising in web technologies and creating bespoke functionality for new and existing businesses.

- Met in person with clients to find out what they needed out of a website and came up with solutions.

- Designed prototypes in Adobe XD with UI/UX best practices.
- Worked with clients to find best solutions for customer needs.
- Made sure all websites met web standard accessibility guidelines.
- SEO best practices put in place including schemas, metadata, and sitemaps.
- Wrote clean, maintainable, and scalable code.
- Setup content management systems to give a user-friendly way for clients to update their sites. Mainly worked with Prismic and Sanity.
- Used Git source control to manage websites.

Royal Mail
Lead Customer Operations Manager
Wembley

JUNE 2011 – PRESENT

Royal Mail is the primary postal service in the UK delivering more than 50% of all parcels.

- Managed a team of up to 55 staff. Leading meetings and providing training on new tools and projects.
- Communicated with key stakeholders within the business and successfully hit office KPIs.
- Controlled a fleet of 35 vehicles. Used telemetry to control vehicle safety and trained other managers around the area on how to use the system.
- Managed and improved quality, finance, and safety within my office.
